Quillay, Tree and Bark

Quillaja saponaria

Quillay is a evergreen tree, 15 to 20 meters high. Gray-gray bark. Leaves alternate, glabrous, sharp apex and obtuse base, light green glossy, nearly whole edges with 4-8 teeth. Flowers whitish-whitish, hermaphrodite, pentamas, star-shaped. 5 petals, 5 sepals, 10 stamens and 5 ovaries. Fruit: star shaped capsule, inside many winged seeds. (Source: García, N., y C. Ormazábal (2008). Árboles Nativos de Chile. Santiago: Enersis S.A. p. 196. Consultado el 2011).

Description:

- **Product Name:** Quillay Bark
- **Scientific name:** Quillaja saponaria
- **Cultivation:** Wild
- **Drying:** Under the sun
- **Season:** October, November and December

Quillay, Tree and Bark

Exportaciones:

Tipo	Tons en CTN 20' FCL	Tons en CTN 40' FCL	Packing
Chopped	10	20	35kg Polypropylene Bags
Wholet	10	20	50kg Bales

Characteristics:

Characteristics: Quillay bark has a high content of saponins, a type of surfactant compounds, that is, that have the ability to reduce the surface tension of water by dissolving in it, which generates abundant foam when said solutions are stirred vigorously. In the industry saponins have been used as foaming elements in food and beverages, animal vaccines, cosmetics, soaps, shampoos, etc.
